

NOTICE OF PUBLIC OPEN HOUSE MEETINGS FOR THE PROPOSED SALT FORK WIND 345 KV TRANSMISSION LINE

Tuesday October 14, 2014
Anytime between 4:00 to 7:30 PM
Route 66 Museum (Devil's Rope Museum)
100 S. Kingsley Street
McLean, Texas 79057

Cross Texas Transmission, LLC (CTT) is proposing to construct a 345 kilovolt (kV) single circuit high voltage electric transmission line. The project is being developed to integrate additional wind energy resources from the Salk Fork Wind, LLC project proposed in Gray and Donley Counties, Texas. CTT intends to file a Certificate of Convenience and Necessity (CCN) application requesting authorization from the Public Utility Commission of Texas (PUCT) to construct and operate the transmission line between the Gray Substation, located in Gray County, and Salt Fork Wind's proposed substation, located in Donley County.

The proposed Salt Fork Wind transmission line will be approximately 25 miles long. The proposed line will be constructed in a right-of-way that is 150 feet wide.

Please note that there will not be a formal presentation as part of these meetings. Detailed maps showing the proposed route and other information will be available for individuals to review. Individuals have the opportunity to visit with us anytime between 4:00 and 7:30 PM to ask questions and to provide comments to representatives and technical experts from CTT and its consultants regarding the proposed transmission line. CTT and its consultants will consider information gained during these public open house meetings into the overall routing evaluation that will be submitted as part of the CCN application.

CTT is committed to routing, constructing, and operating the proposed transmission line in a manner consistent with the values of the local communities, and the rules and policies established by the Texas Legislature, the PUCT, and ERCOT.

For more information, please contact CTT toll free at (877) 214-8288 or locally at (806) 350-7500 or via email at info@crosstexas.com
