

### Public Open House Meeting Questionnaire

*Please provide answers to the following questions and leave this questionnaire in the collection box at the Sign-in Table. If you wish to complete this form at home, please return via mail to the above address within two (2) weeks of the meeting date. Cross Texas Transmission, LLC (CTT) appreciates your efforts in completing this questionnaire. The Public Open House Meeting and Questionnaire are important as they are the principal way for CTT to solicit landowner comment, questions, and concerns before it files an application to obtain a Certificate of Convenience and Necessity with the Public Utility Commission of Texas.*

1. Which Public Open House Meeting location did you attend?

McLean

Did not attend

2. What is your primary interest in attending this event?

- A) Own property crossed by the proposed route.  
B) Own property near the proposed route.  
C) Own property with potential for wind development.  
D) Interested in renewable energy.  
E) Other (please explain below).

---

3. How did you learn about the open house?

---

---

---

4. Has the information presented been helpful to your understanding of the project? If not, what could be done to improve this effort?

---

---

---

5. Do you believe the need for this transmission line has been adequately explained?

\_\_\_\_\_Yes

\_\_\_\_\_No

\_\_\_\_\_Uncertain

If “No” or “Uncertain”, what additional information would be helpful to you?

---

---

---

---

6. Before tonight, how familiar were you with the proposed Salt Fork Wind transmission line?

---

---

---

---

7. Do you support the State of Texas’s plan to build additional transmission lines to get renewable energy to market?

---

---

---

---

8. The Public Utility Commission of Texas requires that several factors be considered when routing an electric transmission line, including:

- Proximity to single-family and multi-family dwellings and related structures, mobile homes, apartment buildings, commercial structures, industrial structures, business structures, churches, hospitals, nursing homes, and schools;
- Proximity to commercial radio transmitters, microwave relay stations or other electronic installations;
- Proximity to parks and/or recreational areas;
- Proximity to Federal Aviation Administration-registered airports, private airstrips, and heliports;
- Proximity to historical or archeological sites;

- Agricultural areas irrigated by traveling irrigation systems;
- Environmentally sensitive areas; and
- Protected or endangered species.

CTT's consultant has plotted all of these features that we know about on the Environmental and Land Use Constraints Map. To your knowledge, are those features shown on the map accurately plotted?

Yes\_\_\_\_\_ No\_\_\_\_\_

Are you aware of any of these features that are not presently shown or are incorrectly located on the map?

Yes\_\_\_\_\_ No\_\_\_\_\_

If so, would you help us identify the approximate location of any missing or incorrectly located features on the Environmental and Land Use Constraints Map by marking it on the maps at the Open House, mailing the information to us, or providing your contact information at the end of this questionnaire so that we can discuss the issue with you?

9. Understanding that a transmission line from the Gray Substation to the proposed wind generator substation in Donley County is needed and that CTT will construct and operate the line, please provide your thoughts on the following corridors and routing constraints. Please rank the below Routing Corridor Considerations and Land Use Considerations.

<b>Routing Corridor Considerations</b> (Rank the following items in order of importance from 1 to 5 with 1 being the most important and 5 being the least important; use each number only once)	<b>Rank</b>
Place new transmission line through undeveloped land	
Place new transmission line next to existing transmission lines	
Place new transmission line next to existing gas/oil pipelines	
Place new transmission line next to existing roads	
Place new transmission line next to property lines	
<b>Land Use Considerations</b> (Rank the following items in order of importance from 1 to 8 with 1 being the most important and 8 being the least important; use each number only once)	<b>Rank</b>
Minimize impacts to ecology (playas, plants, wildlife, etc)	
Minimize impact to historic & cultural sites	
Minimize impact to center-pivot irrigation systems	
Minimize length across tilled agricultural land	
Maximize distance from residences	
Maximize distance from public facilities (e.g., parks, schools, churches, cemeteries, etc.)	
Minimize total length of line (reducing the total cost)	
Minimize visibility of the line	

Other Items to Consider (Please explain below; use back if necessary)

---

---

---

---

10. If you have a concern with the location of the transmission line shown on the maps provided, what are your concerns (use back if necessary)? Please identify the landowner or section number.

---

---

---

---

---

11. Please provide additional comments or information you feel CTT should consider (use back if necessary)?

---

---

---

---

---

12. Would you like CTT to follow-up with you on any items that were discussed tonight?

Yes      No

If “Yes”, please identify the items you would like to discuss and provide your name and contact information below.

---

---

---

---

---

---

---

---

Name 

---

Address 

---

City, State, Zip 

---

Telephone 

---

Email 

---

The below information can be found on the bottom right-hand corner of your landowner letter. If you did not receive a landowner letter this information can be left blank.

Segment, Tract Number
