

NOTICE OF PUBLIC OPEN HOUSE MEETINGS FOR THE PROPOSED LIMESTONE TO GIBBONS CREEK 345 KV TRANSMISSION LINE

Thursday, November 20, 2014 Anytime between 4:30 to 7:30 PM Jewett Civic Center 111 North Robinson Jewett, TX 75846	Tuesday, December 2, 2014 Anytime between 4:30 to 7:30 PM Iola Community Center 7264 Main Street Iola, TX 77861	Thursday, December 4, 2014 Anytime between 4:30 to 7:30 PM Truman Kimbro Convention Center 111 West Trinity Madisonville, TX 77864
--	--	---

Cross Texas Transmission, LLC (CTT), in partnership with Garland Power & Light, is proposing to design, construct, and operate a new double circuit 345 kilovolt (kV) high voltage electric transmission line. The proposed transmission line would be constructed between the existing CenterPoint Energy Limestone Substation, located in Limestone County, and the existing Texas Municipal Power Agency (TMPA) Gibbons Creek Substation, located in Grimes County. The Electric Reliability Council of Texas (ERCOT) has determined that this project is critical to improving the reliability of the bulk transmission system in this part of the state. CTT intends to file a Certificate of Convenience and Necessity (CCN) application requesting authorization from the Public Utility Commission of Texas (PUCT) to construct and operate the transmission line between the Limestone and Gibbons Creek substations.

CTT's routing consultant has identified a number of preliminary alternative routes to connect the Limestone and Gibbons Creek substations. A map depicting the preliminary alternative routes is attached hereto. These routes were, in part, developed to parallel existing right-of-ways (ROW) and property boundaries while avoiding or minimizing impacts to environmental and physical constraints. The proposed transmission line will be potentially located in the following counties: Limestone, Freestone, Leon, Robertson, Madison, Brazos, and Grimes. The proposed transmission line will be constructed in a right-of-way that is anticipated to be approximately 130 to 160 feet wide.

Please note that there will not be a formal presentation as part of these meetings. Detailed maps showing the proposed routes and other information will be available for individuals to review. Individuals have the opportunity to visit with us anytime between 4:30 and 7:30 PM to ask questions and to provide comments to representatives and technical experts from CTT and its consultants regarding the proposed transmission line. CTT and its consultants will consider information gained during these public open house meetings in the overall routing evaluation that will be submitted as part of the CCN application.

CTT is committed to routing, constructing, and operating the proposed transmission line in a manner consistent with the values of the local communities, and the rules and policies established by the Texas Legislature, the PUCT, and ERCOT.
